Topic : Telematics Dongle

Objective	Make a low-cost telematics dongle for data acquisition
Deliverables	- Prototype Dongle with Mobile App. - Connectivity Module
Scope of Work	- Develop Circuitry - Software Development - Mobile App Development - Connectivity - Cloud Storage
Criteria	- Cost - Technology - Design - Reliability - Repeatability
Takeaways	- Skill Development - Immersive Learning - Interaction with Tech. Leaders - Industry Connect
Team Size	5 minds
Duration	3 days

What ETL will Provide?

- Infrastructure
- Electronic Components
- Lab Access
- Technical Support
- Project Honing
- Problem Solving Toolkit
- Data Points
